

HEALTH AND SAFETY POLICY

OUR BELIEF:

NT Airports values the health and safety of all employees, contractors, tenants, air operators and the general public that use and visit our airports. We believe that everyone has the right to be safe in our work environment.

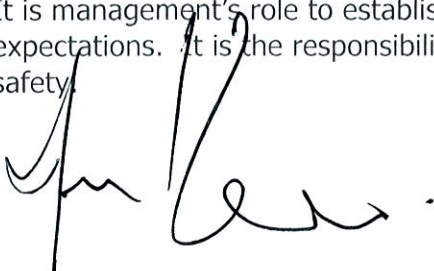

OUR COMMITMENT:

We are committed to the highest standards of safety and will strive for continual improvement in our safety performance.

OUR ACTIONS:

- Aspire to zero harm – ensure safety is our number one priority as we commit to achieving a safe and accident free business.
- Operate a safety and risk management system aligned to International and Australian best practice standards.
- Develop and implement "Safety Action Plans" for each airport. These will be the key drivers in ensuring we achieve our targeted outcomes.
- Empower our people with quality training and resources, ensuring they are "safety leaders" in our business.
- Conduct risk assessments for all projects, high risk tasks and procurement activities on airport.
- Ensure compliance with relevant safety and associated legislation, standards and codes of practice.
- Generate concise and accurate reporting systems including internal and external audits, safety inspections and safety observations; and
- Ensure that all contractors and other stakeholders working within the airport environment comply with current safety legislation.

It is management's role to establish these safety commitments as a priority and to communicate safety expectations. It is the responsibility of every individual to be actively involved in our commitment to safety.

Ian Kew

Chief Executive Officer
